

Risk and Resilience in the Face of Global Change

30 November – 5 December, 2015 • Aspen, Colorado

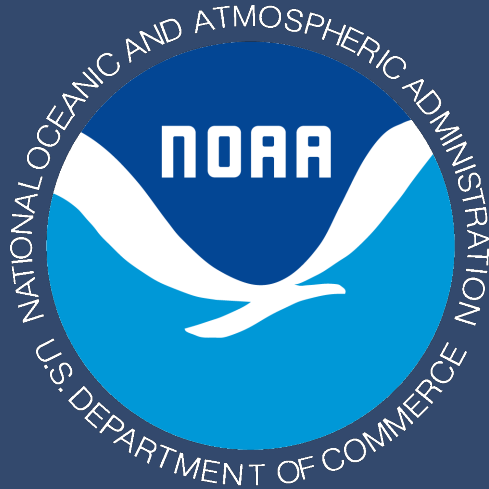

AGCI Mission

*To further the understanding of Earth
systems and global environmental
change in the service of society*

Support for this workshop

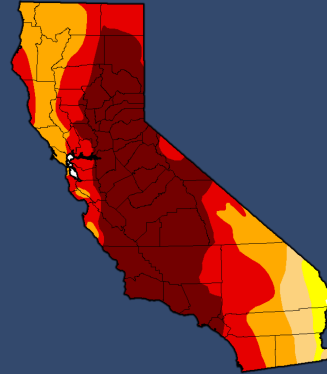

THE
KRESGE
FOUNDATION

This week

- Advancing understanding of resilience, inspired by risk
- Learning across the interface of science and practice
- Building new collaborations that support your work as well as the broader community of research and practice

U.S. Drought Monitor
- California (11/24/15)

COP 21 Begins!

Welcome to Aspen!
Thank you for coming.

(Please let any AGCI Staff member know if
there's anything we can do to help!)

One definition of resilience

- Reduce the greenhouse gas emissions that contribute to climate change
- Plan for the changes that are underway or anticipated
- Foster social cohesion and inclusion
